BORGGEOSCIENCE

CURRICULUM VITAE

Brendan James Borg
PO Box 234, Beaconsfield Upper, VIC, 3808
M: +61 418 395 537
E: brendan.borg@borggeoscience.com.au

EDUCATION

Master of Science (Hydrogeology and Groundwater Management)
University of Technology, Sydney, New South Wales
2005 - 2008

Bachelor of Science (Geology/Environmental Science)
Monash University, Clayton, Victoria
1993 – 1996

PROFESSIONAL MEMBERSHIPS

Member of the Australasian Institute of Mining and Metallurgy (AusIMM)
Member of the International Association of Hydrogeologists (IAH)

EMPLOYMENT HISTORY - CURRENT POSITIONS

Non-Executive Director
Leo Lithium Limited (ASX:LLL)
October 2021 – Current

- Board member
- Developing the world class Goulamina Lithium Project in Mali in joint venture with Ganfeng Lithium

Non-Executive Director
Kuniko Limited (ASX:KNI)
April 2021 – Current

- Board member
- Developing Zero Carbon battery minerals projects in Scandanavia
- Most successful ASX IPO in 2021

Non-Executive Director
Sarytogan Graphite Limited
November 2021 – Current

- Board member
- Developing the Sarytogan Graphite Project in Kazakhstan
- ASX IPO scheduled for early 2022

Director/Principal Consultant
Borg Geoscience
March 2014 – Current

- Providing geological consulting services to the company's clients.
- Clients have included Tempus Resources Limited (ASX:TMR), Mali Lithium Limited (ASX:MLL), Celsius Resources Limited (ASX:CLA), Red Mountain Mining Limited (ASX:RMX), Greenpower Energy Limited (ASX:GPP), Metalicity Limited (ASX:MCT), Renascor Resources Limited (ASX:RNU), Marmota Energy Limited (ASX:MEU), Lithex Resources Limited (ASX:LTX) and Sol Jar Property Pty Ltd.
- Assignments have included acquisition, planning and implementation of exploration programs in lithium, graphite and nickel projects, statutory reporting, and provision of strategic advice on project development.
- Selection and management of exploration projects held by Borg Geoscience.

EMPLOYMENT HISTORY - PAST POSITIONS

Non-Executive Director
Firefinch Limited (ASX:FFX)
November 2018 – May 2022

- Board member and Chair of Remuneration and Nomination Committee
- Operator of the Morila Gold Mine and formerly the Goulamina Lithium Project in Mali

Managing Director/Non-Executive Director
Tempus Resources Limited
April 2018 – February 2021

- Co-founded and successfully listed on the ASX.
- Successful capital raising of AUD 9 million to fund activities.
- Management of the gold and copper mineral exploration and development activities of the Company.

Managing Director/Non-Executive Director
Celsius Resources Limited
April 2017 – March 2021

- Management of the mineral exploration and development activities of the Company.
- Acting as Competent Person under the JORC Code for Australian Stock Exchange and other reporting requirements.
- Successful capital raising of AUD 19 million to fund activities.

Exploration Manager
Lithex Resources Limited – Perth
December 2011 – March 2014

- Planning, supervision and management of exploration programmes at the company's lithium, tin, tantalum, graphite and rare earth exploration projects at various locations around Australia.
- Acting as Competent Person under the JORC Code for Australian Stock Exchange and other reporting requirements.
- Supervision of external consultants undertaking work on behalf of the Company, including exploration, geophysical surveys and metallurgical studies.
- Undertaking due diligence on potential new projects and for the Company and presenting recommendations to the board.

Manager - Exploration
Uranex Limited (now Magnis Energy Technologies Limited) – Melbourne
September 2009 – December 2011

- Planning, supervision and management of exploration programmes at the company's uranium, coal and gold projects in Tanzania and Australia.
- Major achievements were doubling of the Mineral Resource at the Company's Manyoni Uranium Project in Central Tanzania in 2009 and discovery of the Likuyu North uranium deposit in Southern Tanzania in 2010/11.
- Leading the resource modelling of the deposits (Using Micromine) and coordinating external consultants undertaking Resource Estimation.
- Supervision of Exploration Managers for Tanzanian and Australian operations.
- Acting as Competent Person under the JORC Code for Australian Stock Exchange and other reporting requirements.
- Participation in the promotion of the company to investors at seminars and conferences, including presentations.

EMPLOYMENT HISTORY - PAST POSITIONS (CONT.)

Chief Geologist
IronClad Mining Limited – Adelaide
October 2007 – May 2009

- Planning, supervision and management of exploration, resource definition, metallurgical drill programs at the Wilcherry Hill and Hercules iron ore/manganese/gold prospects.
- Major achievements included identification of the Hercules magnetite/goethite/manganese deposit, culminating in an initial Inferred Resource of >200MT of iron ore.
- Leading resource modelling (Using Micromine) of the deposits and coordinating external consultants undertaking Resource Estimation.
- Supervision and mentoring of Graduate, Project and Senior Geologists on-site during drill programmes and in the office during data assessment, interpretation and modelling.
- Acted as Competent Person under the JORC Code for Australian Stock Exchange and other reporting requirements.
- Development of geological logging and ore characterisation system for the Wilcherry Hill and Hercules deposits.
- Participation in the promotion of the company to investors at seminars and conferences, including presentations.

Supervising Geologist
Rio Tinto Iron Ore – Resource Development - Perth
March 2005 – October 2007

- Planning and supervision of large multi-rig resource definition RC and Diamond drilling programmes in the Pilbara region of Western Australia.
- Ensuring all activities complied with best practice management of Safety, Environmental and Heritage considerations.
- Geological modelling of iron ore deposits using Vulcan software, with particular emphasis on Marra Mamba deposits.
- Mentoring/coaching of Contract, Graduate and Evaluation Geologists on-site during drill programmes and in the office during data assessment, interpretation and modelling.
- Representing the interests of the Resource Development Group in the transition to a new Geological Database (acQuire).
- Planning and scheduling of future drilling programmes to support the 5 and 40 year mine plans of the wider business.
- Preparation of tenement reporting documentation.
- Environmental Representative.

Environmental Geologist
CH2M HILL Australia Pty Ltd
December 2003 – March 2005

- Project Management, including budget control, management of contractors and negotiations with clients.
- Conducting contaminated soil and groundwater investigations, including supervision of drill rigs, sampling and installation of groundwater investigation bores.
- Introduction, implementation and management of MapInfo/Discover GIS for large environmental projects Australia-wide, including training of staff members in its use and preparing presentations for staff across Australia.
- Successfully prepared documentation and subsequently won competitive tenders for large environmental investigation projects and new clients, including Port of Melbourne Corporation, generating substantial revenue for the business.
- Providing assistance to the EPA accredited Environmental Auditor in the preparation of statutory environmental audit reports.

EMPLOYMENT HISTORY - PAST POSITIONS (CONT.)

Environmental Geologist
Lane Consulting Pty Ltd
February 2003 – December 2003

- Management of environmental consulting projects across the range of industry sectors and services provided by the firm.
- Provision of environmental consulting services including GIS mapping and analysis, database operation, computer modelling, hydrogeological investigation and human health and ecological risk assessment.
- Geological input and advice on projects managed by other staff members, including geological cross section development and interpretation of gamma logging data.
- Review and critique of technical reports prepared by other consultants.
- Introduction, implementation and management of MapInfo/Discover GIS for large environmental projects.
- Providing assistance to the EPA accredited Environmental Auditor in the preparation of statutory environmental audit reports, including management of audit projects.

Geologist
Unimin Australia Limited (Formerly ACI Industrial Minerals) – Melbourne/Adelaide
March 1999 – February 2003

- Conducting exploration drilling programs in a diverse array of geological settings and industrial mineral commodities, and subsequent resource reporting.
- Commodities included pegmatite minerals (feldspar), silica sand/mineral sands, limestone, dolomite, granite, shellgrit, and barite.
- Geological modelling of deposits using Minesight and MapInfo Discover software.
- Grade control in open cut and underground mines for various Industrial Mineral commodities.
- Conducting GPS surveys and producing plans using MapInfo GIS software.
- Production and implementation of Environmental Management Plans.
- Liaising with government departments and regulatory bodies.
- Supply of GIS solutions for various applications including evacuation plans for mine sites, rehabilitation plans, cadastral plans, five year mine plans and other plans as required.
- Supervision of contract geologists and field assistants in grade control and drilling programs.
- Experience in WA, SA, QLD, Victoria and New South Wales.
- Participation in multi–disciplinary Continuous Improvement Projects.

Development Technologist
ACI Industrial Minerals – Melbourne
January 1997– March 1999

- Metallurgical and chemical testing of exploration drilling and bulk samples, and subsequent reporting of results.
- Conducting investigations into mineral processing and product quality issues at various mines around Australia.
- Researching new beneficiation methods to improve product quality.
- Quality control of mineral products.
- Assisting geologists and engineers with various exploration and mineral processing projects.
- Supervision of Laboratory assistants.

SKILLS AND TRAINING

Software

- MapInfo/Discover GIS
- Micromine
- GBIS Database
- acQuire Database
- DataShed Database
- Vulcan
- Visual Modflow
- Minesight
